- Standard bank transfer (also known as a wire) is the most cost-effective method. Please note, to complete the payment you will need to make arrangements with your bank (in person, online, or over the phone) and send your funds to Flywire in your chosen currency
- Debit/credit card will allow you to make an online payment in your home currency. Unlike traditional international credit card payments, Flywire handles the foreign exchange so you will know the exact amount that will be deducted from your account before you make your payment. Please note that debit/credit card payments are not available in every country or for every institution
- Flywire will then convert your currency and pay your institution
- If you select your home country but you do not see your home currency, do not worry — you can always pay in the currency of your institution or select a different currency. To do so, click the “I want to pay in another currency” link at the bottom of the page. The process and benefits will remain the same for these payment methods, however, your bank will handle the foreign exchange before sending the funds to Flywire
